

Sprint Plan

Programming Life Team 1

Sprint 1

Week 4.2

Requirement/Story	Task	Task assigned to	Estimated effort per task
		<i>name(s)</i>	<i>hours</i>
As a customer I want a crude visual representation of the graph data	Process the provided graph data into a data structure	Marissa	3
	Find a suitable library for representing graphs and use it to represent the graphs	Mark	4
Put the graph in the context of the evolutionary relationship between bacteria	Orientate on processing phylogenetic trees	Justin	3
	Orientate on the different representations of the phylogenetic tree	Maarten	3
As a customer, I want the developers to have knowledge on the domain	Attend the lectures given by the customer	Everybody	5×6
Provide semantic zooming to enable useful visual interpretation at various zoom levels from whole-genome to individual mutations	Orientate on what kind of semantic zoom levels will be useful	Chak Shun	3
